ARMS SALES NOTIFICATION

Mr. CORKER. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress receive prior notification of certain proposed arms sales as defined by that statute. Upon such notification, the Congress has 30 calendar days during which the sale may be reviewed. The provision stipulates that, in the Senate, the notification of proposed sales shall be sent to the chairman of the Senate Foreign Relations Committee.

In keeping with the committee's intention to see that relevant information is available to the full Senate, I ask unanimous consent to have printed in the RECORD the notifications which have been received. If the cover letter references a classified annex, then such annex is available to all Senators in the office of the Foreign Relations Committee, room SD-423.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

POLICY JUSTIFICATION

Australia—Upgrades for F/A-18E/F Super Hornet Aircraft

The Government of Australia requested the possible sale of thirty-two (32) Multifunctional Information Distribution System Joint Tactical Radio System (MIDS JTRS) with four channel Concurrent Multi-Network (CMN-4), and thirty-nine (39) AN/ALQ-214A(V)4 Countermeasure Systems. This will also include all system integration and testing, component improvement, test and tools equipment upgrades, support equipment replenishment, supply support, publications and technical document updates, personnel training and training equipment upgrades, aircrew trainer device upgrades, U.S. Government and contractor technical assistance

and other related elements of logistical and program support. The total estimated program cost is \$101.4 million.

This sale will contribute to the foreign policy and national security of the United States by helping to improve the security of a major contributor to political stability, security, and economic development in the Western Pacific. Australia is an important Major non-NATO Ally and partner that contributes significantly to peacekeeping and humanitarian operations around the world. It is vital to the U.S. national interest to assist our ally in developing and maintaining a strong and ready self-defense capability.

The proposed sale will improve Australia's capability in current and future coalition efforts. This equipment will help the Royal Australian Air Force better communicate with and protect its F/A-18 aircraft, and the addition of MIDS JTRS will accomplish the goal of making U.S. and Australian aircraft more interoperable when supporting operational forces. Australia will have no difficulty absorbing this equipment into its armed forces.

The proposed sale of this equipment does not alter the basic military balance in the region.

The prime contractors will be the Harris Corporation, Melbourne, FL. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale may require the assignment of U.S. contractor representatives to Australia which will be determined at a later date.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

TRANSMITTAL NO. 17-34

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex Item No. vii

(vii) Sensitivity of Technology:

1. Multifunctional Information Distribution System (MIDS) Joint Tactical Radio System (JTRS) Concurrent Multi-Network (CMN-4) is classified CONFIDENTIAL. MIDS JTRS CMN-4 is a secure data and voice communication network using the Link-16 architecture. The system provides enhanced situational awareness, positive identification of participants with the network, secure fighter-to-fighter connectivity, and secure voice capability. It provides three major functions: Air Control, Wide Area Surveillance, and Fighter-to-Fighter. The MIDS JTRS CMN-4 can be used to transfer data in Air-to-Air, Air-to-Surface and Fighter-to-Fighter scenarios.

2. The AN/ALQ-214A(V)4 is an advanced airborne Integrated Defensive Electronic Countermeasures (IDECM) programmable modular automated system capable of intercepting, identifying, processing received radar signals (pulsed and continuous) and applying an optimum probability of survival from a variety of surface-to-air and air-to-air RF threats. The system operates in a standalone or Electronic Warfare (EW) suite mode. In the EW suite mode, the system operates various dispensable countermeasures and the onboard radar in the F/A-18E/F in a coordinated, non-interference manner, sharing information for enhanced information. The ALQ-214 was designed to operate in a high-density Electromagnetic Hostile Environment with the ability to identify and counter a wide variety of multiple threats including those with Doppler characteristics. Hardware with the AN/ALQ-214A(V)4 is classified CONFIDENTIAL.

3. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures or equivalent system which might
